

TrustGard™ Primo Collection

Our very best! Comes standard with “the works!”

The Primo Collection is a homeowner’s dream ... Energy Star standard, superior structural rating of H-R40, your choice of double pane, double strength Low E insulated glass with Argon gas or triple pane clear with Argon gas. Strong and energy efficient, Primo windows fit any design need: double hung, slider, end vent slider, picture window, geometric shape and bow or bay configurations.

STANDARD FEATURES

- A Fusion welded 3¼" frame has multiple chambers for enhanced strength and energy efficiency
- B Elegant soft bevel on frame exterior affords ¾" surface for blind stop
- C True sloped sill design on double hung provides positive water shedding
- D Constant force (coil) balance system for smooth, trouble-free sash operation
- E Your choice of double strength, double pane, Low E insulated glass unit with Argon gas or triple pane clear with Argon gas for energy savings and year-round comfort
- F Truseal Duralite™ glass sealant provides unsurpassed warmth at periphery of insulated glass unit
- G Fusion welded sash has metal reinforced meeting rails and bottom lift rail for exceptional strength and durability
- H A sleek, contoured, hooded sash lock, together with streamlined, low-profile tilt latches, replaces “meeting rail clutter” with understated elegance
- I Integral interlock and double weather stripping for extra draft protection
- J Top and bottom sash tilt inward for easy cleaning
- K Double sash locks (over 24")
- L Dual, deluxe, pop-out vent stops
- M Rigid, extruded aluminum screen frame insures lifelong, trouble free operation
- N Foam wrap applied to periphery of frame for enhanced weatherization
